

War on Wobblies Aptitude Test

How well do you know your anti-wobbly products?
Connect each anti-wobbly product to the correct definition.

ANTI-WOBBLY PRODUCT

- Example Product
- Tyler
- Scorpio
- Gyron
- XR
- Libra
- Spacecam
- Chapman/Leonard
- Filmotechnic
- Wescam
- Cineflex

ANTI-WOBBLY PRODUCT DESCRIPTION

- Kinda Not Wobbly. Gotta love those toys! A laser range finder for the air? Now that's cool!
- Original Not Wobbly. They've disappeared off the face of the earth. You can always tell your kids about them.
- Cloned Wobbly. Different sign, but same wobbly performance.
- Description that has something to do with Example Product.
- Lots of Wobbly. Should have spent more money on product development instead of the sexy car. Vroom.
- Heavy Wobbly. Simply changing the name is super, but still needing a widget to look down isn't.
- Old and Wobbly. Archaic actually. Not sure why it made this list.
- Kinda Wobbly. But the question is – how useful is an upgrade if the only thing that changed is the sticker that says "IV"?
- Really Not Wobbly. Caution – could cause your head to explode when you try to use it.
- Lots of Wobbly. No expensive car and still no money on product development.
- Not too bad Wobbly. With a focus on "law enforcement and surveillance customers," do they care about the entertainment industry?
